MINUTES OF THE BOARD OF DIRECTORS MEETING OF THE PUEBLO CONSERVANCY DISTRICT JULY 20, 1973

The Directors met at 4:00 P. M. on the above date at the office of the District, 1104 N. Main Street, Pueblo, Colorado

ATTORNEY PRESENT : None

DIRECTORS PRESENT : L. M. Rhoades, J. M. Martin & R. W. Taylor

ENGINEER PRESENT : S. F. Elliot

The meeting was called to order and the minutes of the June 29 meeting were read and approved.

The following vouchers were approved:

15683	Dept of Treasury	75.00
15684	Colo. Dept. of Revenue	9.00
15685	L. M. Rhoades	35.00
15686	J. M. Martin	35.00

The checking account now shows a balance of \$19,854.81.

Engineer Elliot reported that Chem-way was presently in the process of spraying the growth in the River Channel, and that at the next meeting of the Directors, a more detailed report of the results could be given.

Engineer Elliot reported that vandals had damaged the locked gate at the Valley Lane entrance to the Channel, and that he had authorized Gradishar to make the necessary repairs.

Mr. Rhoades directed Engineer Elliot to write a letter to the Colorado Dept. of Parks and Game to determine if Runyon Lake had been stocked with fish during the current season, and in the future, to advise the Directors when the Lake is stocked, and with the variety of fish, and amount.

It was regularly moved, seconded and unanimously passed, that for many years the present salaries of the Directors, Consultants and clerical help had prevailed, and that due to the many increases in the cost of living that had taken place during the intervening years, the following rates of fees and salaries would prevail, effective August 1, 1973, and remain as such until changed by the Directors:

Gentlemen:

The Directors, at their regular monthly meeting on July 20th, requested that you advise them if Runyon Lake has been stocked with fish this season, and if so, when and how many of the variety of fish stocked.

You would be helpful to the Directors if, when the Lake is stocked, you would so advise them, and in so doing, list the number of the kind of fish stocked.

The Directors have many inquiries regarding the fishing on the Lake, inasmuch as the District leases the facilities to you.

Very truly yours,

L. M. Rhoades, President

Dear Mr. Rhoades,

Reference is made to your letter of July 23, 1973, requesting information on the fish that were stocked into Runyon Lake during 1973. This information is listed below.

March	Channel catfish	1,750 fish	6 inches plus
	Rainbow trout	2,850 fish	6 inches plus
April	Rainbow trout	5,440 fish	6 inches plus
June	Channel catfish	1,250 fish	6 inches plus
July	Large Mouth Bass	1,120 fish	3 to 4 inches long

According to our records, this is all the fish that has been stocked in Runyon Lake in 1973 and up until part of July. More fish may be stocked later in the Fall when the lake water is colder for trout. This will depend on any extra surplus trout. Most of our warm water fish comes from out-of-state or salvage operations so at this time I do not know if Runyon Lake will receive any more warm water fish in 1973. The rainbow trout that we stock average 8" to 12" or about 4 fish to the pound. The channel catfish that was purchased from Kansas averaged about 10" to 12" or about 3 to the pound.

At the end of each year we have a total of fish that was stocked in each water. If you desire, this will be sent to you in January, 1974, for your records on Runyon Lake.

Very truly yours,
